INSPIRATION THROUGH TRAVEL

Travel, Tourism & Aviation

INTRODUCTION

At Bucks New University, we have exciting and innovative courses that are specifically designed to give you a head start for a career in the travel, tourism, corporate events and the conference and aviation industries.

We are at the cutting edge of practice and research, with all our programmes led by highly dedicated specialists with advanced professional experience and active national and international research profiles. The result is teaching that prioritises the importance of a 'hands on' approach, informed by a 'real world' understanding of what it takes to be successful in your chosen field. We also have long established links with these sectors, enabling you to gain valuable work experience while you are studying here, and giving you the edge when you graduate.

You'll find we are a dynamic, supportive and friendly University with your interests and progress at the top of our agenda, and a strong commitment to developing your overall employability, expertise, confidence and competencies. With courses that reflect the very latest trends, we can make certain you get the very best of starts to your career. If you're already working in the industry, our courses can help you update your knowledge and give you the new skills needed to accelerate your progress up the career ladder.

Other courses that may be of interest to you:

BA (Hons) Business and Tourism Management

BA (Hons) Event and Festival Management

BA (Hons) Music and Live Events Management

MSc Aviation Security

DID YOU KNOW?

- All the University's courses are designed with input from top industry professionals.
- There's no student support package quite like the University's award-winning Big Deal*, giving eligible undergraduate Bucks students a range of great benefits.
- The University was nominated for 'Outstanding Support for Students' in the *Times Higher Education Awards 2009*.
- Also in 2009, Bucks was judged one of the best universities for courses and lecturers by students using the Hotcourses website: **whatuni.com**.
- From societies and sports to bars, clubs and cafes, Bucks Students' Union certainly offers a lot – and most of it for free*! Run for students, by students, the Union also provides friendly advice and representation to ensure your views are heard.
- Bucks Students' Union won the Best Bar None Award 2009, for the most improved Students' Union venue in the UK.
- Bucks became a Fairtrade University in 2009.
- The University is only 30 minutes from London Heathrow Airport and London is less than 40 minutes away by train.
- Bucks has been open for business since 1893.

INDUSTRY CONNECTIONS

Our excellent industry links will enhance the way in which you will gain knowledge and engage in activities at Bucks New University. By involving staff from our industry partners, we can also make sure you develop a wide range of relevant skills that are needed in the workplace. We are very proud of the support we get from the industry, and we have strong partnerships with a variety of prominent companies.

“Over the past few years of partnership with Bucks in the delivery of the Air Transport with Commercial Pilot Training degree, we have seen the demand increase beyond expectations. The combination of academic and professional qualifications offers graduates greater employment options. We are proud of our partnership with Bucks.”

Shari Peyami,
Director, Cabair

“I currently teach students how to fly at the Moncton Flight College in Canada. I also work on expansion contracts in aviation. I feel that my rounded skills and knowledge in a variety of aviation business topics have been the result of my degree. I look forward to furthering my skills and working closely with Bucks in the future.”

Nabeel Ahmed,
graduated 2008, Flight Instructor,
Moncton Flight College

“Oxford Aviation Academy (OAA) chose to work with Bucks because of their unique experience in work-related degree programmes. This degree gives graduates a key advantage in subsequent employment and provides the aviation industry with high quality pilots who effectively combine industry and professional awareness with their technical skills and knowledge.”

Steve Green,
Manager – Pilot Programmes,
Oxford Aviation Academy

“Working with Bucks New University, and specifically the Corporate Events and Conference Management degree team, has been a mutually beneficial experience for both parties. Not only have we had a student on placement with us, but we have also gained a valuable insight into the University and now have access to a whole range of potential new employees.”

Katharine Gourley,
Human Resources Manager,
Crowne Plaza Marlow

“As one of the largest high profile meetings and events providers in the country, we are always looking for talented and career minded individuals to join our team of dedicated meetings and events professionals. We have a strong relationship with Bucks. They have been very professional and supportive working with us and the students to ensure successful placements on both sides.”

Caroline Dyke,
Human Resources Manager,
Sofitel London Heathrow – an Arora Hotel

“HWA Events works with Bucks in conjunction with their student employability programme. The University arranged a series of ‘meet and greets’ where we got to interview potential candidates; this has to have been one of the most effective recruitment sessions we have ever had. I can honestly say the students are professional in their attitude, produce high quality work and when presented with a problem never shy away.”

David McClughen,
Operations & Logistics Manager,
HWA Events

“We believe that there are numerous benefits for the students and Grass Roots, and that through working with the University we can support one another with ensuring relevant industry information is shared.”

Karen Giles,
Group Operations Manager,
Grass Roots

“Bucks provides an excellent insight into the Corporate Events industry by developing partnerships with key local businesses. In return, the local businesses have the opportunity to a better trained and qualified workforce.”

Ian Seabrook,
Business Development Manager,
Stoke Mandeville Stadium/Leisure Connection

GETTING INVOLVED

Student exchange programmes

As part of some of our courses, you may have the opportunity to study abroad at one of our partner universities. It's a great opportunity to enhance your employability by showing your ability to adapt to a new cultural environment – and it is lots of fun.

For more details, visit bucks.ac.uk

Placements opportunities

Work placements and full-year internships are an important feature of our degree courses, helping our students gain a true taste of industry life. The course teams and the careers department at Bucks have strong links with a number of organisations, and also offer assistance to students in finding appropriate placements.

Professional training courses and short courses

Catering for a diverse range of interests, our short courses can help you achieve your short-term goals. The duration of each course and the mode of study vary depending on the subject matter, with new courses and dates added throughout the year.

For more details, visit bucks.ac.uk

FDA Air Transport Management with Airline Pilot Training

THE FLIGHT PATH TO A MANAGEMENT CAREER

This stimulating programme will enable you to follow a career in the airline industry, initially as a pilot, but with the medium-term objective of being eligible for progression in to an airline management role. It is delivered in collaboration with our partner, Oxford Aviation Academy (OAA) – a leading international provider of airline pilot training.

You'll have the opportunity to develop specialist knowledge of management and operational challenges confronting the air transport industry, while undertaking pilot training that will lead to the CAA/JAA approved Airline Transport Pilot's Licence (frozen) – the level of proficiency necessary to operate as a First Officer on commercial multi-pilot, multi-engine airliners.

The delivery of the programme will mainly take place at the Oxford Aviation Academy Centre, based at Oxford Airport. You will also spend 20 weeks at the Oxford Aviation Academy Centre, based at the Phoenix Goodyear Airport in Arizona, USA. You will benefit from online resources, utilising our Virtual Learning Environment (VLE).

Trainee pilot students can enrol each month throughout the year.

Course content

The programme comprises the following modules:

- Airline Pilot Training Theory
- Air Transport and Regulation
- Air Transport Management and Operations
- The Global Airline Industry.

Career prospects

By completing this programme, you will have demonstrated that you are graduate pilots of the highest calibre: professional, well trained, and well equipped to confront every challenge and able to reach the standards expected of an airline pilot today. You will be able to demonstrate strong leadership and management potential as well as extensive knowledge of the airline business and the industry-related skills necessary for a successful career in the airline and airport industry.

Graduates of this programme are eligible for progression on to the final year of our BA (Hons) Airline and Airport Management degree and, subsequently, the MSc Air Transport Management degree.

Further information

In addition to our own academic entry requirements, you will be required to pass the aptitude tests and interviews of the OAA selection process.

Duration

67 weeks

Mode of study

Part-time

How to apply

Visit oaa.com for details

“The foundation degree gave me a great insight in to the everyday running of the aviation industry. When a potential employer sees this qualification on your CV, it demonstrates your commitment and ability to learn. It will also show potential for further development within the airline in terms of command and managerial responsibilities.”

James Loveridge

FDA International Aviation Management and Airline Pilot Training

INTERNATIONAL DEPARTURES

Developed in partnership with Moncton Flight College, this course offers you the opportunity to gain a recognised academic qualification and obtain an integrated frozen Airline Transport Pilot's Licence (fATPL) – with a type rating endorsement in less than 20 months of study.

This innovative, multifaceted programme offers a combination of routes to more advanced higher education academic qualifications, for example an honours or master's degree. It also offers fully integrated ab-initio airline pilot training through one of the top providers of commercial pilots in Canada.

The curriculum is enhanced by:

- fully integrated ab-initio airline pilot training, where you will gain a foundation degree and obtain a 'frozen' ATPL in approximately 60 weeks
- the option to complete an all inclusive 'flexi-package', combining an academic qualification, an fATPL and a type rating endorsement within 20 months
- the opportunity to develop an in-depth knowledge of the international aviation industry in the areas of airline management, leadership, and operations
- pilot training theory and practical flight training, delivered by Moncton Flight College at their facilities in Canada
- ongoing career support and guidance from Bucks New University and Moncton Flight College
- competitive pricing options.

Career prospects

Graduates who complete this programme will join an alumni of highly trained pilots who have been exposed to flight conditions at an international airport, situated in a uniquely varied weather region.

Coupled with knowledge of the air transport industry, graduates may apply for First Officer positions globally and may also find employment in a wide range of civil aviation organisations and areas of operations, marketing and management.

Further information

The Moncton Flight College has over 80 years of flight training experience and is a member of industry flight simulation leader CAE's Global Academy.

The Canadian Airline Transport Pilots License is highly regarded worldwide. Aviation

authorities outside of Canada may require some form of license conversion in order to operate aircraft commercially in their region; this is a common practice internationally.

As with any form of flight training, substantial costs are involved for the completion of this course.

For more details, email advice@bucks.ac.uk

Duration

18 months

Mode of study

Part-time, flexible and distributed learning

How to apply

Visit bucks.ac.uk for details

BA/BA (Hons) Air Transport with Airline Pilot Training

FOLLOW A UNIQUE COURSE TO YOUR DESTINATION

Reflecting the changes inherent in the dynamic aviation industry, this programme has been developed in collaboration with our partner, Cabair College of Air Training (CCAT), one of the UK's leading providers of commercial pilot instruction.

It is unique in the UK higher education sector, in that it allows students to obtain both an ordinary degree and a frozen Airline Transport Pilot's Licence (fATPL) in around 18 months of study, extending to approximately two calendar years for the BA (Hons) award.

Course content

The degree element of the qualification comprises the follow stages:

- The first stage is an intensive three month period of study, between September and December, at Bucks New University.
- The second stage starts in January and is delivered by computer-based learning; this is in addition to integrated pilot training at CCAT.
- If you are enrolled on the BA (Hons) route, you will still have the option of transferring to the ordinary BA route at the conclusion of stage two; similarly at this stage, if you are enrolled on the ordinary BA route, you may choose to transfer to the BA (Hons) degree.

If you choose the BA (Hons) route, you will need to complete a dissertation over a further 6-12 months.

Career prospects

Graduates who achieve the Commercial Pilot's Licence with Instrument Rating and MCC Certificate will be qualified to apply for First Officer posts with airlines. Graduates may also find employment in the air transport industry in a wide range of organisations, particularly those in the civil aviation business. Some of the larger organisations in the sector, such as British Airways and BAA plc, offer a limited number of places on management trainee programmes, while many others will recruit directly to posts in marketing and operations.

Further information

To ensure all applicants are fully informed about the precise nature of the programme, and to determine their suitability, all UK-based applicants are required to attend an interview/assessment day with CCAT at Cranfield Airport.

The programme for the day involves a Maths and Physics test (equivalent to GCSE level) in the morning and a pilot aptitude training test in the afternoon. Prospective students will also need to meet the University's own academic entry requirements.

Due to the nature of this course, there are substantial additional costs relating to the commercial pilot training phases, which must be completed to obtain a fATPL.

For more details, email advice@bucks.ac.uk

Duration

18 months (BA) plus a further 6-12 months (BA Hons)

BA (Hons) Air Transport with Commercial Pilot Training

CLIMB TO A HIGHER LEVEL

Reflecting the changes inherent in the dynamic aviation industry, this programme has been developed in collaboration with our partner, Cabair College of Air Training (CCAT), one of the UK's leading providers of commercial pilot instruction.

It is unique in that it allows trainee pilot students to obtain a recognised university degree and qualify for a frozen Airline Transport Pilot's Licence (fATPL) – the highest level of commercial pilot's licence – in just three years of full-time study.

As well as developing specialist knowledge of operations, management and leadership in the air transport industry, you will also benefit from the practical skills and theoretical knowledge derived from pilot training.

The curriculum is enhanced by:

- combination of academic study alongside professional qualifications, led by specialist staff
- acquisition of specialist knowledge in the area of airline and airport operations
- pilot training theory and practical flight training delivered by CCAT
- the opportunity (at the end of the first year and during the second year of the programme) to undertake flight training in the USA with Orlando Flight Training or Space Coast Aviation in Florida
- the chance to attain various pilots' licences during the programme, including the Joint Aviation Authority Private Pilot's Licence
- the option to progress to Commercial Pilot's Licence with Instrument Rating and Multi-Crew Cooperation Certificate, subject to aptitude and medical clearance
- input from air transport industry specialists
- career support and guidance throughout the programme.

“This degree enabled me to combine advanced flight training, alongside specialist degree-level teaching. This has proved invaluable in securing a job in airline operations, enabling me to gain industry experience before joining an airline as a First Officer in the future.”

Darren Palmer, graduated 2009, Freelance Commercial Pilot and Airline Dispatcher, Menzies Aviation, London Gatwick Airport

Career prospects

Graduates who achieve the Commercial Pilot's Licence with Instrument Rating and MCC Certificate will be qualified to apply for First Officer posts with airlines. Successful graduates may also find employment in the air transport industry in a wide range of organisations, particularly those in the civil aviation business. Some of the larger organisations in the sector, such as British Airways and BAA plc, offer a limited number of places on management trainee programmes, while many others will recruit directly to posts in marketing and operations.

Further information

To ensure all applicants are fully informed about the precise nature of the programme, and to determine their suitability, all UK-based applicants are required to attend an interview/assessment day with CCAT at Cranfield Airport.

BA (Hons) Air Transport with Pilot Training

RESPOND RAPIDLY TO CHANGING CONDITIONS

Developed with input from industry professionals, including Cabair College of Air Training (CCAT), this forward-looking programme is fully responsive to the ongoing changes taking place in the aviation sector. It's ideal for those interested in a career in the airline and airport business, or in related fields, such as air traffic control, in which a practical knowledge of flying would be an advantage.

This degree allows you to qualify for a Joint Aviation Authorities Private Pilot's Licence (PPL), while gaining specialist knowledge of operations and management of the air transport industry. The PPL qualification provides added value and, if you decide to continue your flying career at a later date, gives you the option to study towards the award of a frozen Airline Transport Pilot Licence (fATPL). If, during the first year of study, you decide to pursue a career as a commercial pilot, you can apply to transfer onto the BA (Hons) Air Transport with Commercial Pilot Training degree.

The curriculum is enhanced by:

- combination of academic study alongside professional qualifications, led by specialist staff
- acquisition of specialist knowledge in the area of airline and airport operations
- pilot training theory and practical flight training delivered by CCAT, one of the UK's foremost providers of commercial pilot training courses
- the opportunity, at the end of your first year, to undertake flight training in the USA with Orlando Flight Training or Space Coast Aviation in Florida
- the option to undertake an extended period of seasonal employment within the air transport industry
- career support and guidance throughout the programme
- input from air transport industry specialists.

Career prospects

As a graduate, you'll have an in-depth knowledge of the air transport industry and its relationship with tourism. Successful graduates may find employment in the tourism industry with a wide range of organisations, particularly those in civil aviation. Some of the larger organisations in the sector, such as British Airways and BAA plc, offer a limited number of places on management trainee programmes, while many others will recruit directly to posts in marketing and operations.

Further information

To ensure all applicants are fully informed about the precise nature of the programme, and to determine their suitability, all UK-based applicants are required to attend an interview/assessment day with CCAT at Cranfield Airport.

The programme for the day involves a Maths and Physics test (equivalent to GCSE level) in the morning and a pilot aptitude training test in the afternoon. Prospective students will also need to meet the University's own academic entry requirements.

Due to the nature of this course, there are substantial additional costs.

"I feel this is the perfect course for anyone with their heart set on a career as a pilot. Along with getting the required licences to apply for that first pilot job, obtaining a full honours degree gave me a competitive edge over the many others going for the same positions."

Martin Doran, graduated 2009

BA (Hons) Airline and Airport Management

LIFE AT THE LEADING EDGE

This degree is at the forefront of the contemporary aviation business. Developed with input from industry professionals, it focuses on trends shaping the sector, and is fully responsive to ever-changing issues and challenges, such as regulation and deregulation, the 'single European sky' and the impact of low-cost carriers.

We aim to equip you with a broad knowledge of the concepts and principles of business management, as well as a practical understanding of how these are applied in the airline and airport sectors. The course is vocationally orientated, so ideal if you plan to pursue a career with an airline or airport operator.

The curriculum is enhanced by:

- lecturers with airline, airport and ground handling experience
- guest lectures by industry professionals
- work placement opportunities
- the chance to gain a Global Distribution System qualification
- field trips
- Royal Aeronautical Society membership.

Career prospects

Our graduates are highly employable in the aviation and tourism industries, and are working in operations or marketing with airlines, airports, ground handlers, despatch, cargo operators, tour operators and supporting industries. Some of the larger organisations offer a limited number of placements on graduate management training programmes. Some graduates have also decided to further their studies by undertaking a master's degree, such as our MSc Air Transport Management.

Duration

“The range of modules within the degree and the completion of an industrial placement in the second year at Manchester Airport allowed me to stand out to employers.”

Eleanor Alcock, graduated 2010,
Guoman and Thistle Hotels Graduate Management Scheme

BA (Hons) International Tourism Management with Air Travel

PREPARE FOR TAKE-OFF

This exciting, vocationally-orientated degree will thoroughly prepare you for roles in the global travel and tourism industry. Developed in collaboration with leading professionals, it is fully responsive to the ongoing changes taking place in the industry, and focuses on the many management and operational challenges facing the sector.

As well as meeting the specific requirements of employers, this forward-looking programme will give you the specific knowledge needed for a successful career in diverse areas of the tourism industry. If you have a particular interest in air travel, it also offers the opportunity to enhance your knowledge and gain the skills necessary for employment at an operational level in the air travel industry.

The curriculum is enhanced by:

- guest lectures
- work placement or volunteer opportunities
- field trips
- industry certification
- a varied menu of assessments.

Career prospects

The highly employable graduates we produce can expect to find employment within any of the four major sectors of the hospitality, transport, tourism and the attractions industry. Opportunities include work with tour operators, ground handlers, destination management companies, public sector tourism planning and development agencies, tourism marketing agencies, developers and suppliers of niche tourism products, airline operators or airport services. In addition, you may choose to develop your own niche tourism venture, or decide to further your studies by undertaking our MSc in Air Transport Management.

“Tourism is a huge industry, and aviation a significant part of it. Only by putting all the parts together are you able to understand the real nature of the tourism business. The course, delivered by people who have both academic knowledge and sound industry experience, provided not only the essential theory but also direction on how to survive in a competitive environment by becoming a strong leader.”

Katarzyna Ulichnowska, graduated 2010

BA (Hons) International Travel and Tourism Management

GO FURTHER

This exciting and varied course concentrates on tourism as an international activity. The organisation and dimensions of this dynamic and growing sector are examined, together with the impacts and social significance of the international tourism industry. The course also focuses on the management challenges facing the tourism industry today, and provides the skills and knowledge needed to work within both traditional and developing tourism sectors.

Field trips are included in the programme, giving you the opportunity to experience tourism 'on the ground' and to apply theoretical concepts to practice. Delivery of the programme is varied and interactive, with knowledge and skills tested through a diverse range of assessments. The programme is forward-looking and is fully responsive to the ongoing changes taking place in the tourism industry.

The curriculum is enhanced by:

- guest lectures
- work placement or volunteer opportunities
- field trips
- industry certification
- a varied menu of assessments.

Career prospects

There are many areas in which our highly employable graduates could choose to work – with tour and e-tourism operators, ground handlers, destination management companies, public sector tourism planning and development agencies, tourism marketing agencies and developers and suppliers of niche tourism products. You could also become attraction managers, resort representatives or tour guides. In addition, you may choose to develop your own small niche tourism ventures or further your studies by undertaking a master's degree.

"I thoroughly recommend studying at Bucks New University, particularly as a mature student. My fears about 'fitting in' were completely unfounded; the staff were tremendously supportive and the students treated me like everyone else. I've gained a fantastic sense of achievement in obtaining my degree."

Sue Bleach, graduated 2010

BA (Hons) Corporate Events and Conference Management

PUTTING THEORY INTO PRACTICE

Led by lecturers with extensive industry and academic experience, this unique programme offers you a new way to study corporate events and conference management. Incorporating a blended approach of work-based, face-to-face and e-learning. You will supplement your 12 hours per week study with a further 12 hours on-the-job learning in a conference or hospitality venue, helping you to bridge the gap between theoretical knowledge and practical implementation.

The programme has been developed through extensive consultation with industry professionals, focusing on trends and challenges shaping the sector – so you'll gain the relevant knowledge and skills essential for managers of corporate events and conferences. You'll also develop your personal and enterprise skills, such as communication, teamwork, problem-solving, decision-making, initiative and creativity, while enhancing your awareness of the work environment in professional, social and behavioural contexts.

The curriculum is enhanced by:

- employment opportunities throughout the three years of the programme
- a combination of classroom and on-the-job learning
- the chance to plan and stage a corporate event or conference
- field trips
- industry accredited certifications.

Career prospects

As a graduate, your employment opportunities include: hotels, conference venues, wedding and events planners, corporate hospitality organisers, exhibition organisers, incentive travel organisers and conference organisers.

Duration

Three years

Mode of study

Full-time, work-based blended learning

“Choosing this course has meant that not only do I benefit from the extensive experience of my lecturers but I also gain invaluable on-the-job experience in a work placement that has allowed me to put my academic knowledge into practice.”

Rachel Ward, current student

MSc Air Transport Management

TAKE YOUR CAREER TO NEW HEIGHTS

This programme aims to provide you with advanced analytical and critical skills, together with an in-depth understanding of the current management and operational issues in the air transport industry.

Delivered by experienced tutors, most of whom have recent airline industry management experience, it is of great value to students looking to broaden knowledge and skills with a view to enhancing career prospects.

As well as meeting the needs of people employed in the airline industry, either as pilots or in management or operational roles, the programme will also appeal to those with general management experience and an interest in moving into the aviation sector. Recent graduates of related BA or BSc programmes would benefit in preparation for a career in aviation management.

To make sure the programme is accessible to a wide range of students globally, and can accommodate the needs of those already in employment, delivery is available via one of two modes: a full-time 'face-to-face' mode and a part-time computer-based learning mode, known as flexible and distributed learning.

Course content

The programme comprises the following modules:

Stage one (PGCert)

- The Aviation Business Context
- Strategic Marketing for the Aviation Industry
- Aviation Safety and Security
- Forecasting and Supply Chain Management
- Environmental Management in the Aviation Industry.

Stage two (PGDip)

- Aviation Industry Operations
- Financial Management in the Aviation Industry
- Ancillary Revenue Management
- Disaster Management for Aviation
- Negotiated Learning Contract.

Final stage (master's degree)

- Research Methods
- Dissertation.

On successful completion of each of the three stages you will receive the relevant award: PGCert; PGDip, and MSc, respectively.

Further information

As a postgraduate within this dynamic area of study, you'll gain substantial experience and a broad knowledge of the aviation industry, making you highly employable in the aviation and tourism sectors. This course is ideal if you have ambitions to move into a position of responsibility in aviation operations, marketing or management.

Duration

One or two years

Mode of study

Full-time (one year) and part-time (two years)
